PEONIES
EVERGREENS

A SPECIAL OFFERING
of a few items for shipment
during the Early Fall of 1951

July 16, 1951

FOR FALL PLANTING

IN ADVANCE of our regular Fall Wholesale Price List, which will be ready early in September, we are issuing this preliminary list covering Peonies and Evergreens, items that will be wanted for early shipment this Fall. Shipment of Evergreens can be made at any time after the middle of August, and we will begin digging Peonies the first week in September.

Our regular terms and conditions of sale will apply on all stock offered in this list. Please refer to our regular price lists for a complete description of these terms.

PACKING:—The prices in this list do not include packing for local shipment, which is additional at cost. Peonies will, however, in lieu of discount, be packed free where cash accompanies the order.

TERMS:—On established credit, 2% discount for payment within ten days of invoice date, due net first of second month following date of invoice.

PEONIES

Peonies have been a specialty with us for many years and we are offering a very extensive list of varieties that have been very carefully culled of undesirable types, so that all the varieties offered have some especial merit. The list includes many of the newer and better varieties as well as a comprehensive list of varieties of medium price, in a full range of color, form, and blooming season.

Descriptions in a list of this type are necessarily limited and where fuller descriptions are required they will be sent on request. All varieties are understood to be what is technically known as "double type" unless otherwise specified.

Figures following the name of the variety show ratings according to the latest classification of the American Peony Society. (*) indicates newer varieties not yet rated.

GRADE:—All of the plants offered are strong divisions of three year old plants, carrying from 3 to 5 eyes, well rooted, well balanced, and well developed plants.

SPECIAL APPLICATION OF PRICES:—5 plants of a variety will be furnished at the rate per 10, 30 or more at the rate per 100. The rate per 100 will also apply on orders for named varieties totaling 100 plants or more when such orders call for not less than ten plants of a variety. Less than five plants of a variety will be furnished at 5c per plant over the rate per 10, except for varieties listing at \$10.00 or more per 10, where the rate per 10 will apply on all quantities.

CUT-FLOWER VARIETIES:—Many varieties of Peonies, even some of those carrying the highest ratings, have certain peculiarities of growth and flower which make them entirely unsuited for growing for commercial cut flowers. The best varieties for cut flowers must be reliable and prolific bloomers with long, strong upright stems, good foliage and firm petals of good substance. They must open well when cut in bud and must handle well in shipment and in storage. We are listing below a number of varieties that have proven their value as commercial producers of cut flowers, the varieties in black face type being those that we particularly recommend.
